

Victorious Pizza

Victorious Pizza is a local chain with a few locations around the city. They have a wide range of toppings and some special dishes for each location. The chain's popularity has been growing, however, it hasn't been catching on with the city's large population of college students. The ownership is looking to modernize to attract a younger demographic, and as a part of that, they want a new website. The site should contain information about each of their locations, the menus, the staff and environment, the culture, and careers.
